

Search Feature

The screenshot shows a search interface with the following elements:

- Customer:** A text input field containing "01-DEMO CUSTOMER (Quote Only)" and a "Select" button.
- Search:** A text input field containing "test || Vert".
- Location:** A dropdown menu with "All" selected.
- Product:** A dropdown menu with "All" selected.
- Status:** A dropdown menu with "All" selected.
- Buttons:** A green "Submit" button and a "Reset" button.

- Allows Customer selection for QE CSR login (not required)
 - Customer selection defaults for Customer Role login
- Search value is required
 - Multiple search values can be entered
 - Separate multiple values with || (double pipes)
 - Caps don't matter, spaces do
 - Example: CityView || City view (or condition)
 - Configuration values searched:
 - Serial Number
 - Tracking ID
 - Purchase Order Number
 - Builder / Lot / Subdivision
 - Ticket Number
- Additional options to Filter:
 - Location
 - Product
 - Order Status
- Results are **not** limited by date
- Results load on 'Submit' button click
 - Button turns Green to indicate selection values have changed (click me)
- Excessive query results (over 500) will offer an option to 'Skip Loading'
 - Saves the time it would take to load the screen
 - Offers an opportunity to enter more specific search criteria
